Press Release

WOODY WAGOON™ ADDS A NEW DIMENSION TO THE HONDA ELEMENT

The Element “Woody” kit perfectly highlights the composite body panels with this fun and stylish woody design. Nothing says hip or cutting-edge like a cool kit from Woody Wagoon™ featuring heavy “Di-Noc” vinyl and a 3M attachment system!

Kits are OEM approved, quick to install, **offer lucrative profits**, and an unprecedented 3-year guarantee. The kit offers a “real” three dimensional wood experience with simulated Marine-Teak panels, and proprietary “Santa Rosa Oak” raised, quarter-round plastic trim.

All kits are manufactured to ISO 9001 standards and are shipped ready-to-install and include detailed instructions designed for the first-time installer. Instruction kits consist of two manuals, descriptive text, and how-to photos, which make the installation trouble-free. Even if you need a hand, tech help from Woody Wagoon’s professional installers is just a phone call away. Hundreds of home enthusiasts, even an 80-year-old grandmother, have installed our kits! Call today for the location of your local retailer, installer, or for ordering information.
